Industrial, energy, and oil and gas companies are being heavily impacted by increased workflows, tighter budgets and business disruptions from world health concerns and ever-evolving trade compliance issues, driving new levels of uncertainty and risk for the legal department.

## OUR SOLUTIONS

Accessing the right talent is key to your success during times of increased risk and fluctuating work volume. Axiom supports automotive, chemicals, oil and gas, aerospace and defense, airlines, energy, raw materials, real estate and construction, and transportation clients.

To meet these challenges, legal departments must:

- Gain access to world-class talent across 100 different specialty areas
- Build a dynamic legal team that can respond to increased workflows and business disruptions
- Work with a partner who understands the unique demands of energy, industrials, and oil & gas legal teams
